# TKM. XTREME KIT.

TKM. Xtreme Kit is the only system in the world that can clone the Megamos® Crypto transponders used by several car brands.

The extraordinary performance of the Keyline cloning devices make for an exceptional level of flexibility, that widens considerably their range of action: **884 Decryptor Mini** with the latest generation **Keyline Cloning Tool App** and **884 Decryptor Ultegra** with the powerful Keyline software.

TKM. Xtreme Kit makes it possible to clone the Megamos® Crypto transponders of 34 car brands, including several Volkswagen, Audi, Seat, Škoda, Porsche, Alfa Romeo, Buick, Cadillac, Chevrolet, Citroën, Daewoo, Daf, Fiat, Ferrari, GMC, Great Wall, Holden, Honda, Infiniti, Isuzu, Iveco, Jaguar, Kia, Lamborghini, Lancia, Lexus, Maserati, Mitsubishi, Opel, Peugeot, Pontiac, Proton, SsangYong and Volvo models, for a total of more than 200 models available to date.

TKM. Xtreme Kit is a software update that enables the cloning of all Megamos® Crypto transponders with TKM heads or GKM chips.

The cloning process can be started simply by inserting in your device the TKM. Xtreme electronic head, which can subsequently be reused as a standard new head.

Thanks to TKM. Xtreme Kit, now **884 Decryptor Mini** and **884 Decryptor Ultegra** can clone almost 2000 car models: up to 95% of the cars, trucks and motorbikes from the past 20 years still in operation.

TKM. Xtreme Kit is the innovative result of Keyline's great technological advance, an added advantage for all automotive professionals.
