A BIANCHI 1770 GROUP COMPANY

# TKM. XTREME KIT.

**TKM. Xtreme Kit** is the only system in the world that can clone the **Megamos® Crypto** transponders used by several car brands.

The extraordinary performance of the Keyline cloning devices make for an exceptional level of flexibility, that widens considerably their range of action: **884 Decryptor Mini** with the latest generation **Keyline Cloning Tool App** and **884 Decryptor Ultegra** with the powerful **Keyline** software.

**TKM. Xtreme Kit** makes it possible to clone the **Megamos® Crypto** transponders of 34 car brands, including several Volkswagen, Audi, Seat, Škoda, Porsche, Alfa Romeo, Buick, Cadillac, Chevrolet, Citroën, Daewoo, Daf, Fiat, Ferrari, GMC, Great Wall, Holden, Honda, Infiniti, Isuzu, Iveco, Jaguar, Kia, Lamborghini, Lancia, Lexus, Maserati, Mitsubishi, Opel, Peugeot, Pontiac, Proton, SsangYong and Volvo models, for a total of more than 200 models available to date.

**TKM. Xtreme Kit** is a software update that enables the cloning of all **Megamos® Crypto** transponders with TKM heads or GKM chips.

The cloning process can be started simply by inserting in your device the TKM. Xtreme electronic head, which can subsequently be reused as a standard new head.

Thanks to **TKM. Xtreme Kit**, now **884 Decryptor Mini** and **884 Decryptor Ultegra** can clone almost 2000 car models: up to 95% of the cars, trucks and motorbikes from the past 20 years still in operation.

**TKM. Xtreme Kit** is the innovative result of Keyline's great technological advance, an added advantage for all automotive professionals.

**TKM. Xtreme Kit** это единственная система в мире, которая способна клонировать транспондеры **Megamos® Crypto**, которые используются в различных моделях современных автомобилей.

Исключительные способности устройств клонирования Keyline достигают таким образом высочайшего уровня многогранности, значительно расширяя спектр их действия: **884 Decryptor Mini** с **App Keyline Cloning Tool** самого последнего поколения и **884 Decryptor Ultegra** с мощной программой **Keyline**.

**TKM. Xtreme Kit** дает возможность клонировать транспондеры **Megamos® Crypto** 34 производителей автомобилей, среди которых множество моделей Volkswagen, Audi, Seat, Škoda, Porsche, Alfa Romeo, Buick, Cadillac, Chevrolet, Citroën, Daewoo, Daf, Fiat, Ferrari, GMC, Great Wall, Holden, Honda, Infiniti, Isuzu, Iveco, Jaguar, Kia, Lamborghini, Lancia, Lexus, Maserati, Mitsubishi, Opel, Peugeot, Pontiac, Proton, SsangYong и Volvo. Всего имеется почти 200 клонируемых моделей, доступных на настоящий момент.

**TKM. Xtreme Kit** - это обновление программы, которое позволяет активировать клонирование всех транспондеров **Megamos® Crypto** с головками TKM или с чипом GKM.

Процесс клонирования можно легко запустить, просто вставив в свое устройство электронную головку TKM. Xtreme, которую потом можно повторно использовать обычным образом.

Благодаря **TKM. Xtreme Kit** сегодня **884 Decryptor Mini** и **884 Decryptor Ultegra** могут клонировать более 2000 моделей автомобильных ключей: вплоть до 95% автомобилей, грузовиков и мотоциклов, используемых в течение последних 20 лет.

**TKM. Xtreme Kit** - это инновационный результат грандиозного прорыва технологии Keyline, несомненный шаг вперед для всех профессионалов в области автосервиса.

**TKM. XTREME KIT.**

Keyline S.p.A.
